

Friendster is Temporarily Unavailable

Thank you for using Friendster and sorry for the inconvenience.

Since we opened our beta trial to the world in March, Friendster has surged in popularity to quickly become one of the busiest sites on the Internet.

This exponential growth has overloaded our servers. We are adding dozens of more servers to handle the tremendous demand for the Friendster service.

We appreciate your patience during these temporary growing pains.

You may click Reload/Refresh in your browser to try again.
